

OIL AND GAS DEVELOPMENT OF TRI-STATE

Latest Reports of Operations in West Virginia, Pennsylvania and Ohio.

At long intervals a good producer is found in the old districts and usually inspires new work. On Richwood run, Grant district, Wetzel county, the

THE MODERN NEED

Is a remedy for the evil effects of quick eating, over-eating and strenuous living. The medicine that meets this need—that tones the stomach, stimulates the liver, regulates the bowels—is

BEECHAM'S PILLS

Largest Sale of Any Medicine in the World. Sold everywhere. In boxes, 10c, 25c.

Richwood Oil Company has now completed and shot its test on the John Mills farm and it is showing for a thirty-five or forty barrel producer in the Maxon sand. The fact that it is in shallow territory will encourage the drilling of more wells in that locality.

The Big Injun sand development near Roseville, Clay district, Monongalia county, is completing a good many wells but all are light pumps. The Carnegie Natural Gas Company's No. 4 on the Grant Stevens farm is a ten barrel pumper. The same company's test on the J. N. Statler farm is in and showing for the same kind of a producer. In the same district, the Pentress Gas Company's test on the Simeon Johnson farm and the Hope Natural Gas Company's test on the William Price farm are each good for five barrels a day. The Hope company completed a second test on the G. B. Barrickman farm and has a gasser in the Gordon sand.

On Bartholomew run, Mannington district, Marion county, the Hope Natural Gas Company completed a second test on the Parry Hibbs farm and has a light gasser. In the same district, the Carnegie Natural Gas Company drilled a test on the Jacob L. Murray farm through the Maxon sand and it is showing for a five-barrel pumper. The Hope Natural Gas Company's old gasser on the J. M. Campbell farm, drilled down to the Big Injun sand is still holding up at thirty barrels a day.

Light Well in New Pool. West of Pine Grove in Green district, Wetzel county, the Wildwood Oil Company drilled its test on the B. Midcap farm, located on Fishing creek, through the Big Injun sand and it is

SAGE TEA DARKENS HAIR TO ANY SHADE

Don't Stay Gray! Here's an Old-Time Decide that Any-body Can Apply.

The use of Sage and Sulphur for restoring faded, gray hair to its natural color dates back to grandmother's time. She used it to keep her hair beautifully dark, glossy and abundant. Whenever her hair fell out or took on that dull, faded or streaked appearance, this simple mixture was applied with wonderful effect.

But brewing at home is messy and out-of-date. Nowadays, by asking at any drug store for a 50-cent bottle of "Wyeth's Sage and Sulphur Hair Remedy," you will get this famous old recipe which can be depended upon to restore natural color and beauty to the hair and is splendid for dandruff, dry, feverish, itchy scalp and falling hair.

A well-known downtown druggist says it darkens the hair so naturally and evenly that nobody can tell it has been applied. You simply dampen a sponge or soft brush with it and draw this through your hair, taking one strand at a time. By morning the gray hair disappears, and after another application or two, it becomes dark, glossy, soft and abundant.—Advertisement.

not showing for more than five or ten barrels a day. In the same district, the Eagan Oil and Gas Company has drilled its test through the Big Injun sand and found nothing. It is now drilling to the Gordon sand.

The Columbia Carbon Company drilled its No. 14 on the Lewis Maxwell farm, located on Arnold's creek, West Union district, Doddridge county, through the Maxon sand and has a fair gasser in that formation. On Mod's run, Lincoln district, Marion county, Cochran, Wood and Company have a fifth sand gasser at their test on the S. J. Toothman farm.

Shallow Territory. On Rock creek, Harrisville district, Ritchie county, R. E. L. Frymire drilled his test on the John S. Pierpont farm through the Squaw sand and hunk. On the Little Kanawha river in Spring creek district, Wirt county, Cochran and Funk have a duster in all sands at their test on the C. S. Vandall farm. The hole has been plugged and abandoned. Only a light show of oil was found in this test. On Sugar creek, Lafayette district, Pleasants county, McMullen and Company's test on the R. A. Gorrell farm is producing thirty barrels a day from the Keener sand.

On Gillespie run, Grant district, Ritchie county, R. G. Gillespie has completed No. 7 on the Russell and Company farm and found the Squaw sand barren. A light gas pressure was developed in the Big Injun formation. On Lynn Camp run, the Carnegie Natural Gas Company's test on the L. S. Dodd farm is through the Squaw sand and is dry and abandoned.

Fair Gasser in Lincoln County. On Trace Fork, Duval district, Lincoln county, the Wayland Oil and Gas Company drilled a second test on the C. S. Austin farm through the Berea grit and developed a gasser with a capacity of 1,500,000 cubic feet a day. On Evans fork, Big Sandy district, Kanawha county, J. M. Carnes completed No. 5 on the Goshorn heirs' farm and secured a ten barrel pumper in the Weir sand.

On Left Fork of Sandy creek, Geary district, Roane county, the United Fuel Gas Company drilled its test on the V. A. Ludkins farm through the Big Injun sand at a depth of 1,948 feet and developed a gasser. The location is 2,000 feet south of the South Penn Oil Company's test on the Louisa Nichols farm.

In Hanover township, Beaver county, Pennsylvania, Freshwater, Hudson and Company are in the sand at a second test on the John Braden heirs' farm and have a show for a light pumper. In Morris township, Greene county, the Carnegie Natural Gas Company's test on the Watson farm has been averaging forty-seven barrels a day for the last week.

Chamberlain's Tablets Doing Good. Mrs. F. F. Smith, Groversville, N. Y., writes to the manufacturers of Chamberlain's Tablets as follows: "I feel it my duty to write to you and tell you of the good your tablets are doing for me and many others that I have told about them. For over three years I have been troubled with liver trouble. I have been under the doctor's care most of the time, but have not found anything that has helped me as much as Chamberlain's Tablets." Obtainable everywhere.—Advertisement.

THE BREAD MAKING METHODS

Of the old style may have been satisfactory to the people in their day. But such methods would not suit the fastidious taste of the people of this community at the present time.

Our Bread

Does satisfy the people of this community because it is wholesome, is scientifically made in a sanitary bakery, and is everything that the best Bread should be. It has the desired home flavor.

Quality and cleanliness are the twin mottoes of this bakery at all times

DAY OBSERVED.

Schools were closed, banks did no business, the postoffice observed holiday hours and county and other offices and places of business were closed Tuesday. The reason for all this was that the day was the anniversary of the natal day of George Washington, first president of the United States. The day was quiet.

A good grade of paper can now be commercially made from the hop refuse of breweries, which has heretofore been thrown away.

How To Make the Quickest, Simplest Cough Remedy

Much Better than the Ready-Made Kind and You Save \$2. Fully Guaranteed

This home-made cough syrup is now used in more homes than any other cough remedy. Its promptness, ease and certainty in conquering distressing coughs, chest and throat colds, is really remarkable. You can actually feel it take hold. A day's use will usually overcome the ordinary cough—relieves even whooping cough quickly. Splendid, too, for bronchitis, spasmodic croup, bronchial asthma and winter coughs.

Get from any druggist 2 1/2 ounces of Pinex (50 cents worth), pour it in a pint bottle and fill the bottle with plain granulated sugar syrup. This gives you—at a cost of only 64 cents—a full pint of better cough syrup than you could buy for \$2.50. Takes but a few minutes to prepare. Full directions with Pinex. Tastes good and never spoils.
You will be pleasantly surprised how quickly it loosens dry, hoarse or tight coughs, and heds the inflamed membranes in a painful cough. It also stops the formation of phlegm in the throat and bronchial tubes, thus ending the persistent loose cough.
To avoid disappointment, be sure and ask your druggist for "2 1/2 ounces Pinex," and don't accept anything else.
A guarantee of absolute satisfaction, or money promptly refunded, goes with this preparation. The Pinex Co., Ft. Wayne, Ind.
